Patient presented ambulatory and in no acute distress. Vital signs were within normal limits at triage. Orientation to person, place and time was intact throughout the encounter and no acute neurological deficit was observed.

So far as is material to the claim, the report records gout, recently escalated to specialist care; no change to current therapy. The examining clinician expresses no opinion on causation beyond the observations set out in the body of the report.

The remainder of the report deals with matters not in issue and has been omitted from this extract. A complete copy is available for inspection on reasonable notice.
