Where a discrepancy exists between the summary tables and the underlying records, the underlying records govern. Summary figures are provided for convenience only and are regenerated whenever the source data changes.

Tab 3 — identity verification record

Identity was verified in person at the office. The client produced a passport, number 435632899, which was photocopied and placed on the file. The date of birth given as 1980-10-12 is consistent with the document presented.

Verification was carried out by Priya Raghunathan, RN, Charge Nurse, who confirms that the original document was seen and that the copy on file is a true likeness.

Tab 4 — medical report (extract)

Discussed activity modification and a graded return to normal load over the coming six weeks. Written instructions were provided and the patient demonstrated understanding by teach-back before discharge.

So far as is material to the claim, the report records iron deficiency anaemia, monitored quarterly; commenced on a new regimen. The examining clinician expresses no opinion on causation beyond the observations set out in the body of the report.

The remainder of the report deals with matters not in issue and has been omitted from this extract. A complete copy is available for inspection on reasonable notice.
