

Riverbend Health — Consolidated Patient Record

Record assembled ENC-2024-365615 · medical record number MRN8287861 · printed for internal review

This record consolidates the registration data, encounter notes, results and billing entries held for the patient named below. It supersedes any partial extract previously circulated.

1. Registration

Patient of record: **Peggy Crawford**, date of birth 1945-11-26. The patient resides at 15704 John Cliff Suite 410, South Samuelchester, GA 54767 and confirmed at check-in that this address remains current for correspondence and for the mailing of after-visit summaries.

The patient is best reached on 268.884.4431 during business hours and has opted in to portal messaging, delivered to margaret.crawford12@yahoo.com. Interpreter services were not required.

Registration verified against photo identification presented at the desk. No discrepancy noted between the presented document and the record.

For coordination of benefits the registrar recorded that the social security number on file is 810-64-4723; this was read back and confirmed. The patient declined to supply a secondary insurer at this time.

Where a discrepancy exists between the summary tables and the underlying records, the underlying records govern. Summary figures are provided for convenience only and are regenerated whenever the source data changes.

Nothing in this correspondence should be read as an admission of liability, a waiver of any right or defence, or a determination of coverage. All rights are expressly reserved pending completion of the review described in the preceding sections.

Amounts shown are stated in United States dollars unless otherwise indicated. Figures may be rounded to the nearest cent and totals may therefore differ from the sum of their components by a small margin. Corrections identified after issue will be reflected in the next scheduled statement rather than by reissue.

2. Encounter narrative

Wound site inspected; no erythema, discharge or dehiscence. Dressing changed using aseptic technique. Advised to keep the area dry for a further 48 hours and to return sooner if fever develops.

Reviewed the current medication list with the patient, who reported good adherence and no new adverse effects. No changes were made to the regimen at this visit. Repeat metabolic panel ordered for the next scheduled review.

Clinical impression at the close of the encounter was migraine with aura, monitored quarterly; dose adjusted at this visit. The plan was discussed with the patient, who agreed to the proposed follow-up interval and was given written instructions to take home.

Nursing observations were recorded by Priya Raghunathan, RN, Charge Nurse, who noted no concerns at discharge. Physiotherapy input was provided by Callum Fitzgerald and is filed under the same encounter reference.

Staff contact for queries on this encounter: p.raghunathan@riverbendhealth.example, direct line (608) 555-0137. Do not share staff direct lines with patients.
