

Riverbend Health — Consolidated Patient Record

Record assembled ENC-2024-324419 · medical record number MRN7791423 · printed for internal review

This record consolidates the registration data, encounter notes, results and billing entries held for the patient named below. It supersedes any partial extract previously circulated.

1. Registration

Patient of record: **Robert Collisn**, date of birth 1970-04-09. The patient resides at 9822 Parker Junctions Suite 508, North John, GU 73829 and confirmed at check-in that this address remains current for correspondence and for the mailing of after-visit summaries.

The patient is best reached on (701)250-8124x739 during business hours and has opted in to portal messaging, delivered to robert.collins62@outlook.com. Interpreter services were not required.

Registration verified against photo identification presented at the desk. No discrepancy noted between the presented document and the record.

For coordination of benefits the registrar recorded that the social security number on file is 202-88-2253; this was read back and confirmed. The patient declined to supply a secondary insurer at this time.

Where a discrepancy exists between the summary tables and the underlying records, the underlying records govern. Summary figures are provided for convenience only and are regenerated whenever the source data changes.

Nothing in this correspondence should be read as an admission of liability, a waiver of any right or defence, or a determination of coverage. All rights are expressly reserved pending completion of the review described in the preceding sections.

2. Encounter narrative

Reviewed the current medication list with the patient, who reported good adherence and no new adverse effects. No changes were made to the regimen at this visit. Repeat metabolic panel ordered for the next scheduled review.

Patient presented ambulatory and in no acute distress. Vital signs were within normal limits at triage. Orientation to person, place and time was intact throughout the encounter and no acute neurological deficit was observed.

Clinical impression at the close of the encounter was chronic lower back pain, monitored quarterly; physiotherapy arranged. The plan was discussed with the patient, who agreed to the proposed follow-up interval and was given written instructions to take home.

Nursing observations were recorded by Nadia Sorenson, Physical Therapist, who noted no concerns at discharge. Physiotherapy input was provided by Tobias Lindqvist and is filed under the same encounter reference.
