Figures may be rounded to the nearest cent and totals may therefore differ from the sum of their components by a small margin. Corrections identified after issue will be reflected in the next scheduled statement rather than by reissue.

Where a discrepancy exists between the summary tables and the underlying records, the underlying records govern. Summary figures are provided for convenience only and are regenerated whenever the source data changes.

Section A — appointment

Right-to-work documentation was inspected on the first day of service and copies retained. The social security number 423-97-1189 was recorded from the card presented and checked against the payroll submission before the first pay run.

The address recorded at appointment was 49985 Vang Pines, Shownchester, CT 92484. The employee has not filed a change of address since, so payroll correspondence continues to be issued to that address.

Section C — systems access

A network account was provisioned as micheal.lam10 on the first day of service, with standard entitlements for the role. Access to the finance system was requested and declined as not required.

A password reset was performed by the service desk following a lockout. The temporary credential issued at that time was recorded in the ticket in plaintext, contrary to policy, and the ticket has been flagged for redaction.
