

Riverbend Health — Consolidated Patient Record

Record assembled ENC-2023-592773 · medical record number MRN1654145 · printed for internal review

This record consolidates the registration data, encounter notes, results and billing entries held for the patient named below. It supersedes any partial extract previously circulated.

1. Registration

Patient of record: **Sabrina Daniel Crawford**, date of birth 1994-12-29. The patient resides at 65651 Marc Underpass, Port Brandon, HI 44476 and confirmed at check-in that this address remains current for correspondence and for the mailing of after-visit summaries.

The patient is best reached on (532)590-9279x14560 during business hours and has opted in to portal messaging, delivered to sabrina.crawford50@gmail.com. Interpreter services were not required.

Registration verified against photo identification presented at the desk. No discrepancy noted between the presented document and the record.

For coordination of benefits the registrar recorded that the social security number on file is 457-04-6798; this was read back and confirmed. The patient declined to supply a secondary insurer at this time.

Amounts shown are stated in United States dollars unless otherwise indicated. Figures may be rounded to the nearest cent and totals may therefore differ from the sum of their components by a small margin. Corrections identified after issue will be reflected in the next scheduled statement rather than by reissue.

Nothing in this correspondence should be read as an admission of liability, a waiver of any right or defence, or a determination of coverage. All rights are expressly reserved pending completion of the review described in the preceding sections.

Where a discrepancy exists between the summary tables and the underlying records, the underlying records govern. Summary figures are provided for convenience only and are regenerated whenever the source data changes.

2. Encounter narrative

Wound site inspected; no erythema, discharge or dehiscence. Dressing changed using aseptic technique. Advised to keep the area dry for a further 48 hours and to return sooner if fever develops.

Reviewed the current medication list with the patient, who reported good adherence and no new adverse effects. No changes were made to the regimen at this visit. Repeat metabolic panel ordered for the next scheduled review.

Clinical impression at the close of the encounter was obstructive sleep apnoea, stable since the last visit; no change to current therapy. The plan was discussed with the patient, who agreed to the proposed follow-up interval and was given written instructions to take home.

Nursing observations were recorded by Nadia Sorenson, Physical Therapist, who noted no concerns at discharge. Physiotherapy input was provided by Marlene Okonjo and is filed under the same encounter reference.

Staff contact for queries on this encounter: n.sorenson@riverbendhealth.example, direct line (608) 555-0121. Do not share staff direct lines with patients.

Nothing in this correspondence should be read as an admission of liability, a waiver of any right or defence, or a determination of coverage. All rights are expressly reserved pending completion of the review described in the preceding sections.
